## Course Evaluation Report Inclusive Leadership for Gender Equality - Senior Leaders

Please write one sentence that encapsulates your experience on this course:

- Very well structured, welcoming, and helpful.
- This course was very HELPFUL, providing useful tips and tools to become a better leader.
- Made me realise some suboptimal management behaviour I have.
- Very interesting, would have liked to continue on the subjects we were not able to do and with a more spread agenda, such as half day once a week for 8 weeks (instead of 2x per week for 3 weeks). This would allow us to do real time experiences between sessions.
- Many valuable techniques and tools have been clearly presented and practised in groups to improve our communication and leadership skills. I think that this kind of course is invaluable for group leaders.
- I am really glad that I took the time to follow this course with excellent trainers who know the challenges of leaders in Biology very well.
- Good mix of theory and practical exercises; open to topics important to the group, with many possibilities to actively contribute.
